

Risk Warning

Risk Disclosure Statement

The purpose of this notice is to inform the Client about the risks associated with trading operations in financial markets and to warn the Client about potential financial losses. This notice cannot disclose all possible risks due to the diversity of potential situations.

1. Small price changes in financial instruments can significantly affect the Client's account balance due to leverage. Market movements against the Client's position can result in losses exceeding the initial deposit and any additional funds deposited to maintain open positions. The Client is fully responsible for considering all risks, using financial resources wisely, and selecting an appropriate trading strategy.
2. Many instruments exhibit significant intraday price ranges, implying a high probability of both profits and losses from trading operations.
3. The Client assumes the risk of financial losses due to failures in information, communication, electrical, and other systems.
4. The Client acknowledges that under abnormal market conditions, order processing times may increase.
5. The Client recognizes that the primary server servicing real Clients is the only reliable source of quote information. Quote databases on the client terminal cannot serve as reliable sources of quote information, as unstable connections between the client terminal and the server may result in some quotes not reaching the client terminal.
6. The Client assumes the risk of financial losses caused by force majeure circumstances.
7. The Client has the right to trade on their account using third-party trading systems or third parties not affiliated with the Company ("Third-Party Trading"). In this case, the Client confirms to the Company that they understand all risks associated with Third-Party Trading and hereby waives any claims against the Company for any losses or damages incurred as a result of Third-Party Trading.
8. The Client agrees that if their account is managed by a third party, Salient Investment has the right to request contact details or full verification of the account manager's identity.
9. Considering the above, the Company recommends that you carefully consider whether the risks arising from trading operations in financial markets are acceptable to you, given your objectives and financial capabilities.

This Warning is not intended to dissuade you from trading in financial markets but to help you assess the risks associated with trading in financial markets and to responsibly approach the decision on choosing your trading strategy.
